Forecast for Thursday 17 Sep 2020

Weather: Clear periods and scattered clouds during the early hours, perhaps with a few mist patches developing in some valleys. Any mist quickly clearing during the morning with blue skies and sunshine dominating through the afternoon to bring a fine autumnal day.

Chance of cloud free mountain/hill tops above 600m: 70% becoming 100%. Ribbons of cloud may affect some east facing slopes, around the 500-700m height, until around mid-morning. Otherwise however, the vast majority of summits and ridges will be cloud-free throughout the day.

Visibility: Generally very good with hills and landmarks at considerable distance visible outside of any early cloud. A slight haze at lower levels is expected, especially early and late in the day.

Meteorologist's View

Despite it being mid-September, UV levels are expected to be slightly higher than usual and there is a chance of sunburn if you are outside all day with no sun protection. Otherwise, it will be a glorious autumnal day with no additional weather hazards to be aware of.

Forecast for Friday 18 Sep 2020

Weather: After a chilly start to the morning it will be another dry and largely sunny day with little if any in the way of cloud.

Maximum wind: East or Northeast 15-20mph gusting 25-30mph at times. Very locally 25mph gusting 40mph on some ridges, cols and east-west aligned valleys.

Chance of cloud free mountain/hill tops above 600m: 80% becoming 100%. A few ragged scraps of cloud may affect some east facing slopes, around the 400-600m height, just after dawn. Otherwise however, the vast majority of summits and ridges will be cloud-free throughout the day.

Visibility: Generally very good with hills and landmarks at considerable distance visible outside of any early cloud. A slight haze at lower levels is expected, especially early and late in the day.

Temperature: **Valleys:** Plus 6 Celsius, rising to plus 20 Celsius.
At 600m: Plus 7 Celsius rising to plus 14 Celsius.
Freezing level: Above the summits.
